My research uses artificial language creation and learning experiments to explore the emergence of structure in speech-like signals. Specifically, I'm interested in how the dynamics of signal-meaning mappings, as well as social learning and coordination, affect the nature of emerging structure.

- 2012–
expected 2016 **PhD**, *Artificial Intelligence Laboratory, Vrije Universiteit Brussel*.
Project: ABACUS (Advancing behavioral and cognitive understanding of speech).
Supervisor: Prof. Dr. Bart de Boer
- 2010–2011 **MSc Evolution of Language and Cognition**, *University of Edinburgh*.
Dissertation: "Foreigner Directed Speech: Its role in Cultural Transmission of Language & the resulting effects on Language Typology". Supervisor: Dr. Kenny Smith
- 2007–2010 **BA English Language and Linguistics**, *University of York*, (First Class Honors).
Dissertation: "Morphosyntactic Unification of Case Markers and Postpositions in Hungarian"
Supervisor: Dr. George Tsoulas
- additional **DGfS Summer School 2013**, *Humboldt-Universität zu Berlin*, Language Development: Evolution, Change, Acquisition.

Experience in designing, building and running experiments and analysing data.

Programming R, python (including PsychoPy), html, E-Prime, praat, latex
