

Unicode Support in Trac

Trac encodes all text using [UTF-8](#), including text in tickets and wiki pages. Internal processing of text uses true [Unicode](#) representations. As such, it supports most commonly used character encodings.

If the default encoding in your source code repository is not UTF-8, you can specify it in your [trac.ini](#) file:

```
default_charset = gbk
```

Also ensure that your [database](#) stores its data in UTF-8, otherwise results may be unpredictable.

To convert your database to UTF-8, the easiest way is to create a dump of the database, convert it into UTF-8, for example using [iconv](#), and then import it back into the database.

Examples

Arabic

???? ????? ????? ?? ??????? ?????????? ????? UTF-8? ??? ?? ??? ??????? ?????????? ?? ????? ??????? ???????.
